

COLLAGE BY CHANCE

A fun and unusual way to create art!

A *collage* is a collection of different materials and various things an artist combines to make an artwork. In this fun artmaking activity, dice are used to guide you in arranging different things together, so you end up with a collage guided by chance.

Roll a single die and follow the rules below. You can roll as many times as you like, until you decide your collage is completed.

Gather up these supplies to give it a try: blank sheet of paper, scissors, glue, drawing tools in different colors (crayons, markers, colored pencils, pastels or any other art supply you have on hand), a magazine, and other things found throughout the house. Be sure to ask permission first!

Have fun exploring your creative side!

If you roll a . . .

ONE

Cut something out from a magazine, and glue it anywhere on your paper.

TWO

Use your favorite color to draw or doodle for a few minutes.

THREE

Find something shiny to add (paper clip, staple, glitter, foil, etc.) and glue to your paper.

FOUR

Cut out some letters or words. Holding them as far away as you can get from your paper, drop them down to your paper and glue them wherever they land.

FIVE

Cut out a picture of a person and add it to your work.

SIX

Close your eyes and pick a color. Draw a design in one of the corners or edges of your paper.
